

Mohammed Safwan

+91 8884950785 | safwan.work19@gmail.com | linkedin.com/in/safwan-n | github.com/safwan447 | Bengaluru, India

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, TypeScript, HTML5, CSS3
Frontend: React.js, Tailwind CSS, Responsive Web Design
Backend: Node.js, Express.js, REST APIs, FastAPI
Database: MongoDB, MySQL
AI / ML: Scikit-learn, Random Forest, Reinforcement Learning, LLM Integration, RAG
Cloud & DevOps: AWS, Docker, Git, GitHub, CI/CD, Chrome Extensions API

EDUCATION

Presidency University Bengaluru, India
B.Tech, Computer Engineering Aug. 2023 – Jul. 2027
• Relevant coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP

EXPERIENCE

Web Development Intern Jul. 2025 – Aug. 2025
VaultofCodes Remote
• Engineered a certificate verification web application end-to-end using HTML5, CSS3, and JavaScript, delivering a fully functional, production-ready verification flow within a 2-month internship window.
• Built 3+ mobile-first responsive UI components ensuring consistent cross-device rendering and cross-browser compatibility across all major browsers.
• Operated in a fully remote, async engineering environment – managed deliverables independently and shipped all updates on schedule with zero missed deadlines.

Software Development Intern Jun. 2024 – Sep. 2024
Scaler Bengaluru, India
• Built a Chrome Extension from scratch for real-time website time tracking, featuring a glass-morphism UI and live hh:mm:ss session timer with persistent state across tab switches via Chrome Storage API – deployed as a fully functional, standalone product used in a live environment.
• Developed and integrated a JavaScript-based conversational chatbot into a production website, automating responses to user queries and reducing manual support interaction load.
• Owned both projects end-to-end – architecture, logic, UI, and deployment – demonstrating full solo ownership of 2 shipped software products within a 4-month internship.

PROJECTS

InfraSense-AI | *Python, Scikit-learn, Random Forest, FastAPI, Pandas* 2025
• Built an ML engine for government agencies to predict infrastructure project delays and budget overruns with real-time risk scoring across project variables.
• Trained a Random Forest classifier achieving multi-class risk-level prediction; exposed results via a REST API built with FastAPI for downstream integration.
• github.com/safwan447/InfraSense-AI

Privacy Guard Agent | *Python, Reinforcement Learning, FastAPI, Docker* 2025
• Designed and built an RL environment for automated PII detection and redaction, submitted to the Meta OpenEnv Hackathon; implemented a spec-compliant FastAPI inference server with standardized logging.
• Containerized full deployment pipeline using Docker, enabling reproducible, environment-agnostic execution with a single `docker run` command.
• github.com/safwan447/privacy-guard-agent

KrishiSense | *TinyML, IoT, Edge AI, Python* 2026
• Developed an offline-first, solar-powered edge AI and IoT device for smallholder farmers using TinyML – delivers crop and soil alerts via voice in regional Indian languages with zero internet dependency.
• Selected as institutional representative for Samsung Solve for Tomorrow 2026 under the "AI Living for India" national theme.

CERTIFICATIONS

AWS Generative AI

Certified – Generative AI Fundamentals

Amazon Web Services

Jun. 2025

AWS Solutions Architecture

Certified – Solutions Architecture Simulation

Amazon Web Services

Jul. 2025

ACHIEVEMENTS

Smart India Hackathon (SIH) – Internal Winner: Won institutional selection round at Presidency University, qualifying as institutional SIH representative (2025).

Meta OpenEnv Hackathon: Built and submitted Privacy Guard Agent – a Dockerized RL-based PII redaction system (2025).

Samsung Solve for Tomorrow 2026: Developed KrishiSense, selected under national "AI Living for India" theme.

LinkedIn: Grew developer personal brand to 1,100+ followers as a 3rd-year undergraduate.
